## Endesa's roll-out plan

## Endesa's roll-out plan

Andalucía	4,7 Mln - 42 deployment areas
Cataluña:	4,1 Mln - 40 deployment areas
Canarias:	1,1 Mln - 16 deployment areas
Aragón:	0,85 Mln - 8 deployment areas
Baleares:	0,65 Mln - 8 deployment areas
Total Endesa	11,5 Mln - 114 deployment areas

We estimate the total number of clients at the end of 2015 to be 13 Mln.

## Large scale roll-out

- Communication and dissemination plan to facilitate the roll-out:

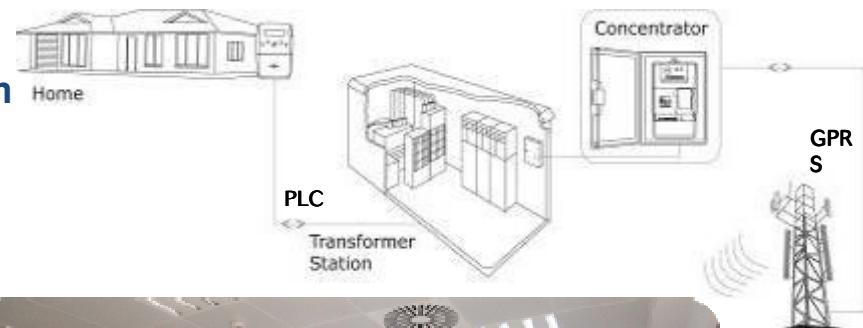

24 hour monitoring centre

Functions:

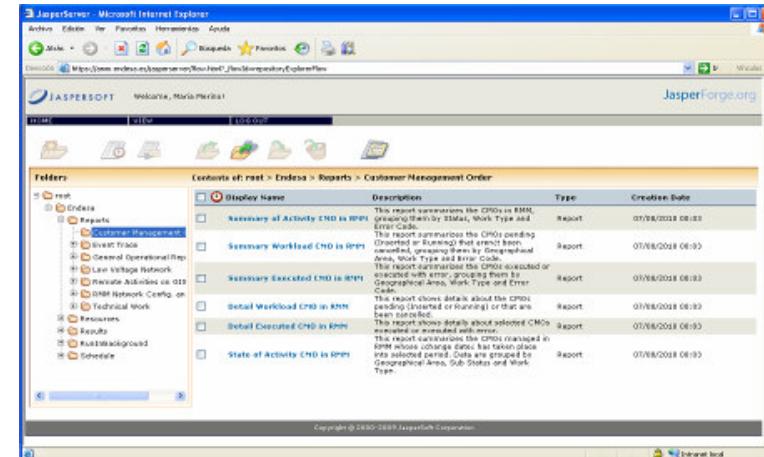

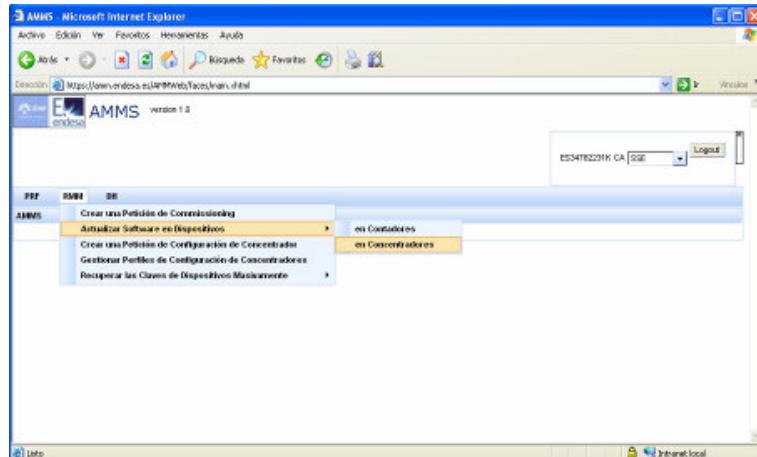

- Maintenance of the whole infrastructure system
- Supervision of daily operations
- Management of incidents

## Operational and management centre

From the point of view of daily operations, the Smart Metering System works as a large contractor, fully integrated with Endesa Legacies.

## Operational and management centre

## Endesa's roll-out plan

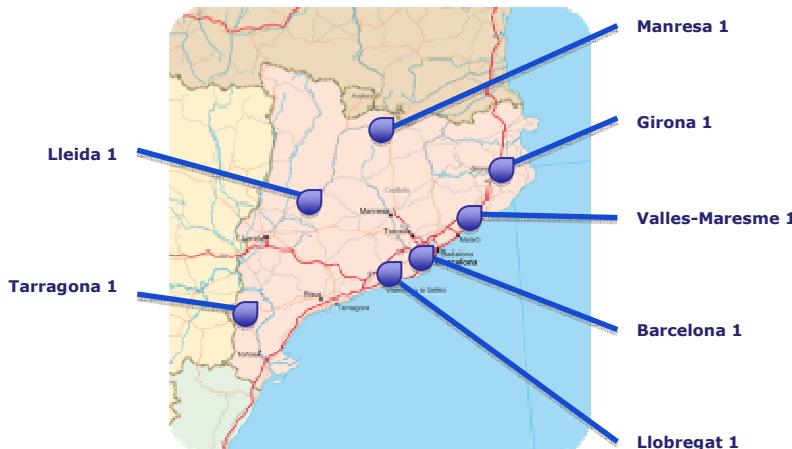

**2011**

Install in all roll-out areas 1.2 million meters  
16,000 concentrators  
Advanced system functionalities

### Example: Division into roll-out areas in Catalonia and Barcelona

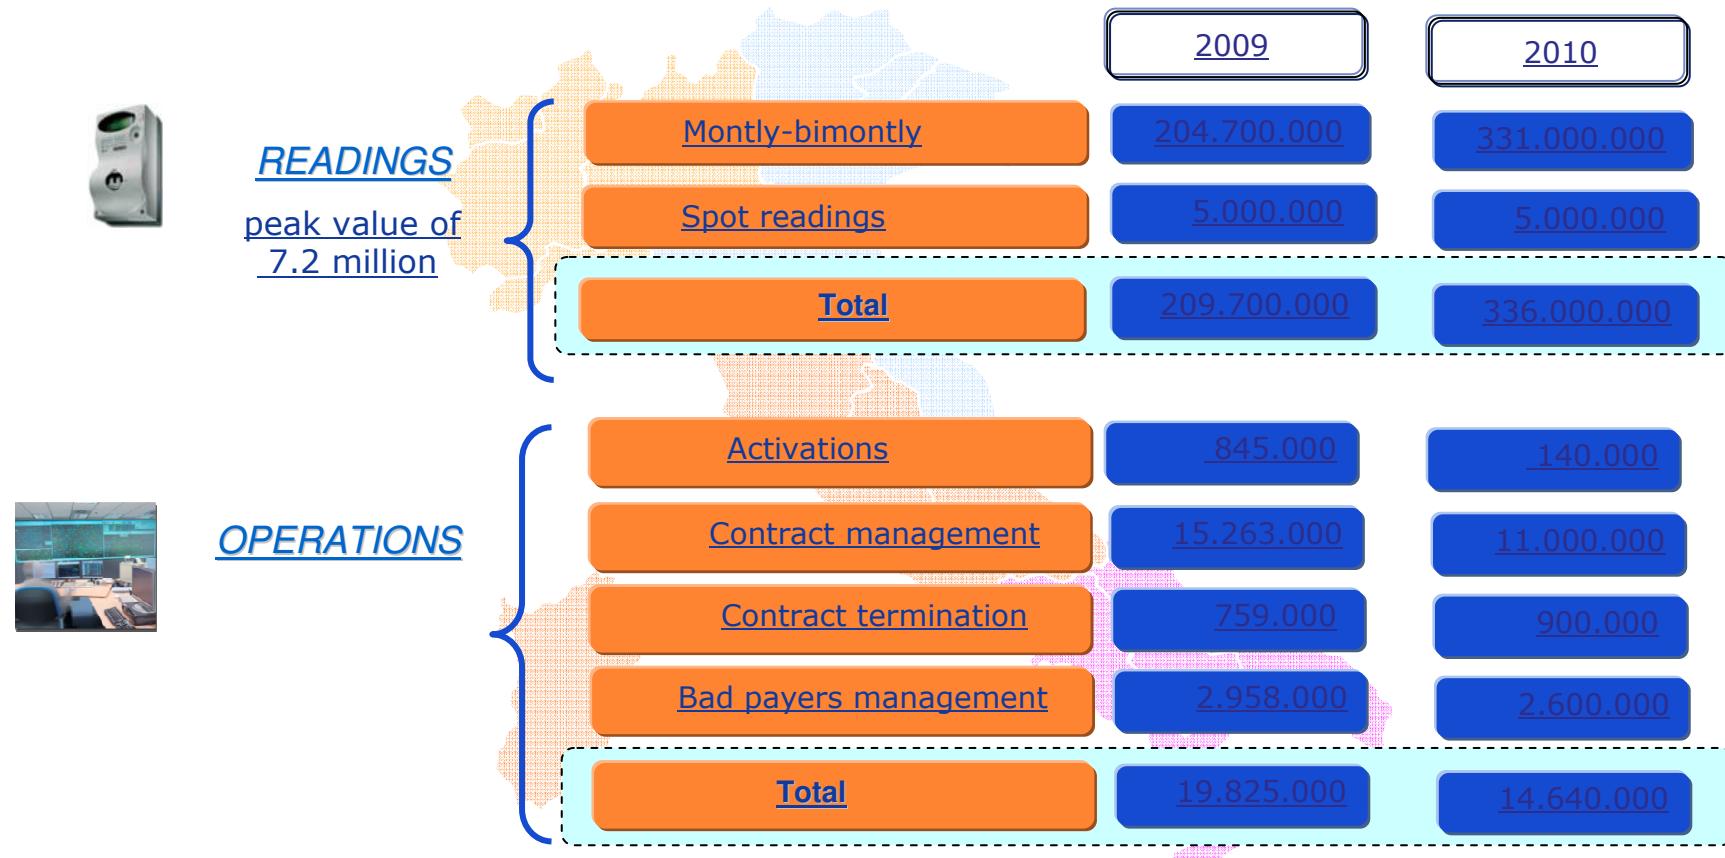

**2012 - 2015**

### Completion Full-scale Roll-Out:

- 13 million meters
- 140,000 concentrators

**Faster Roll-Out than required by the regulatory schedule.**  
**Total investment of over 1,600 million of euros. 2,000 new jobs**

## Remote management of readings and operations in Italy

\*Yearly Data

## Meters and More: an open protocol for smart meters

- **Meters and More** is an **open communication protocol for Smart Metering solutions**.
- **World leading companies** from different business sectors have already joined the Association:

CESI

SAGEMCOM

XIAN SWIP CO., LTD.

ST  
STMicroelectronics

SIEMENS

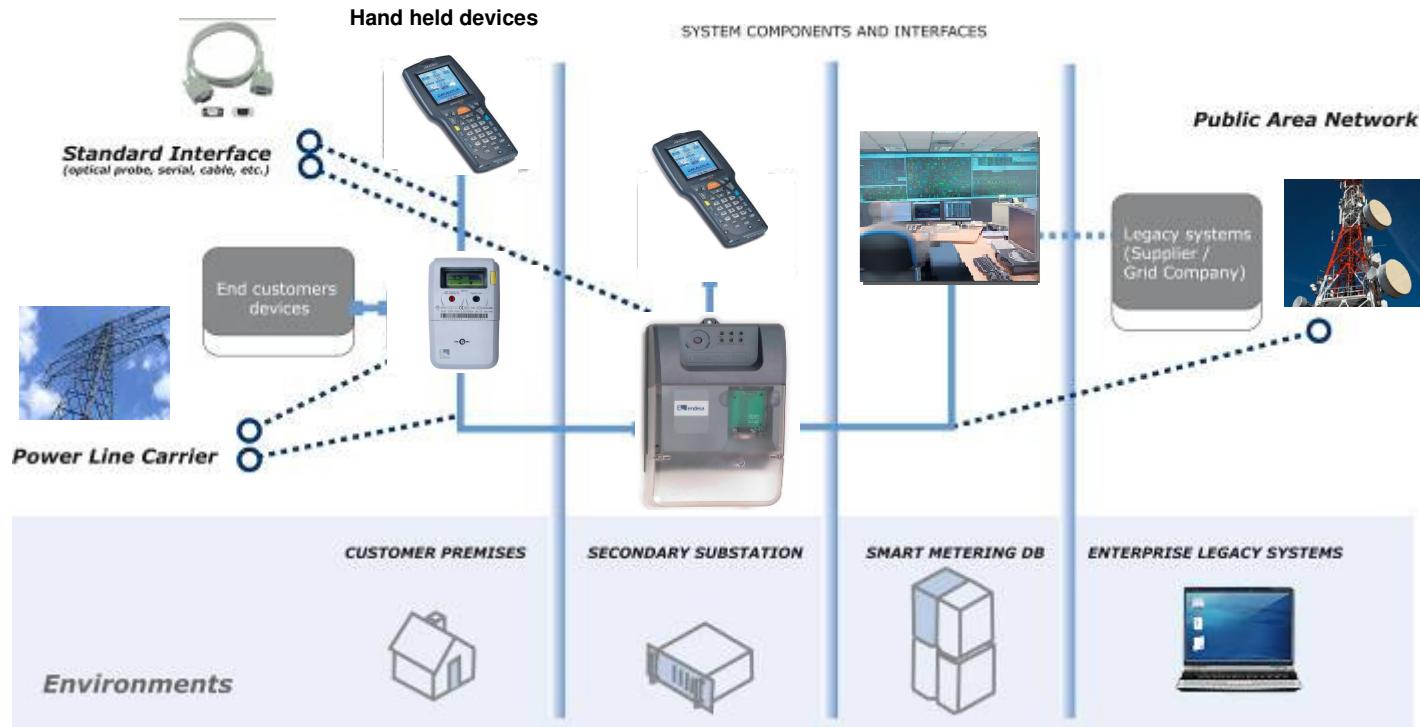

### Main characteristics:

- **Open technology**, built on the specifications of the Enel Telegestore protocol.
- **Efficiency and robustness**.
- **Strong data security**.
- **Flexibility**.
- **Already available and field-proven**.

meters  
AND more  
OPEN TECHNOLOGIES

## Meters and More: an open protocol for smart meters

- The Meters and More protocol defines the communication between:

- Adapted to Spanish and European regulations.
- In process of being standardized at European level

[www.metersandmore.eu](http://www.metersandmore.eu)

- **Endesa is the only company in Europe** with an on-going roll-out of 13 million of smart meters.
- This is a **first real and practical step towards** the development of **Smart Grids** in massive terms.
- Endesa and Enel have developed the latest technological generation of Smart Metering, based on the open, field-proven **Meters and More protocol** (in the process of being standardized).
- Smart metering is **already operational since 2010**.
- Endesa will have a **fully functional system** and will **complete the upgrade of all its meters before the deadline** set by the Spanish regulation.

## Conclusions

**meters  
AND more  
OPEN TECHNOLOGIES**

Frankfurt (Germany), 6-9 June 2011
